The area identified with red line is a priority site for unauthorised occupation prevention.

Currently there is a ditch that was dug as a rapid response to prevent an unauthorised occupant from settling on the open space.

However, this is not a permanent solution and a mound of approx. 600mm height is proposed to be installed. The current ditch would be filled up and a mound created as a permanent solution.

This document details the extent and nature of the intervention for permanently preventing unauthorised occupation on site.
Re-graded land profile to merge into mound
